

KMK Group

BUILD. RETHINK. RECYCLE.

ABOUT US

"KMK Group" is an international level company in the construction and manufacturing sector which includes representation of European leading building materials brands and own manufacture of biological wastewater treatment plants.

Each of the company brand has its own field of activity within the framework of one strategic goal - the creation of high-quality products using modern and most environmentally friendly materials.

BUILD. The company has been represented prefabricated and easy-to-apply materials and products used in the construction industry since 2004.

RETHINK. Each direction of activity based on the main deliberate strategic goal - the maintenance and preservation of the environment.

RECYCLE. The main function of our own production line, as well as the specificity of other represented brands is – recycling.

OUR VALUES

EMOTIONAL BALANCE

We try to always remain in a resourceful state and maintain emotional stability. We show a positive attitude, empathy for others and faith in success. Harmony and work-life balance are important to us

PROFESSIONAL GROWTH

We are constantly raising the bar, not allowing ourselves and our colleagues to "grow out of our professional shoes". We strive for continuous development and not only in work, but also personally

COMPETITORS- FRIENDLY

We have changed the concept of "competition" to "collaboration" and "experience". Many competing companies around the world have become our partners

OPENNESS

Any initiative or proposal in the company finds a response and implementation. We are not afraid to experiment and most often our risks are justified

MUTUAL RESPECT

We show respect to everyone around us. Each of us is a person, and we do not forget about it. Here everyone can be themselves

WOW EFFECT IN EVERYTHING

This is one of our basic principles. The result of our work is not just satisfied customers, but delighted customers

CREATING VALUE

We constantly ask ourselves what value our company brings to the world. We are sure that our work changes us and our environment for the better

TEAMWORK

We support each other in joint work and development, we can always count on each other's help. Together - we are the power

HISTORY

2004

"KMK Group" was founded on May 24, 2004

From the first day of work, we strive to implement the most daring and new ideas in the construction markets of Ukraine and the world, creating optimal products for our consumers, taking into account the modern rhythm of a human and preserving the environment.

2005

"KMK Group" become a representative of Czech production Topas sewage treatment plants

After a year of successful cooperation, the company have decided to start own production of biological wastewater treatment plants under the name "Topas Ukraine" with an emphasis on global innovations and trends.

2006

Opened its own factory for the production of a local treatment plant Topas Automatic

"KMK Group" took a step closer to protecting the environment and opened its own factory for the production of a local treatment plant Topas Automatic. Topas Ukraine has successfully established itself both in the Ukrainian and international markets. *Cleaning quality indicators are proven by laboratory tests.*

2009

Official representative and importer of the Greek-made waterproofing materials "Alchimica"

This year, "KMK Group" became the official representative and importer of Greek-made waterproofing materials "Alchimica" in Ukraine. In a short period of time, Alchimica's Hyperdesmo waterproofing has won the trust of consumers throughout Ukraine.

2013

Official representatives of the Belgian environmentally friendly "Paneltim"

Since 2013 year "KMK Group" has become the official representatives of the Belgian environmentally friendly "Paneltim" plastic sandwich panels in Ukraine and to this day successfully continue cooperation, inventing new products by using this material.

2014

New line of business - chipboard "QuickDeck"

The "KMK Group" includes a new line of business - the representation of chipboard for all types of finishing and construction work "QuickDeck". A feature of QuickDeck is a balanced combination of operational parameters of the material and its environmental friendliness. The formaldehyde emission class is E1, which is acceptable for use even in medical institutions and kindergartens.

2019

"KMK Group" founded its own waterproofing brand – "RinoFlex"

RinoFlex products have incorporated many years of experience of Greek professional technologies of the world-famous waterproofing Alchimica and domestic developments in the field of production, taking into account the natural climate of Ukraine.

2020

The "KMK Group" launched the production of new products under the PlastBuild

The "KMK Group" launched the production of new products under the PlastBuild, including cellars, fonts, boats, bar counters and other products. Modern polypropylene products are the most reliable, hardy, safe and durable.

2021

Full rebranding: We clearly see the result of the activity and the future direction

That is why the decision was made to move on to straight lines leading to an understanding of what the right material of the future should be. The logo has become a representation of our slogan: Build, Rethink, Recycle. Nowadays "KMK Group" successfully continues cooperation with international companies and equipment of our own production has won the trust of customers in all parts of Ukraine, as well as in Azerbaijan, Georgia, the CIS countries, Kyrgyzstan, Kazakhstan and Equatorial Guinea, the Baltics.

2022

... Due to the military invasion adjustments have been made

Cooperation with the Russian company "Quick Deck" was terminated. New restart. The "KMK Group" understands that it can help Ukrainian people with its activities. A new project based on Belgian "PanelTim" plastic called Paneltim shelters. With these products, we provide people with protection from natural or military threats and their consequences (tornado, hurricane, destruction, debris, blast and shock waves).

"KMK Group" today is powerfully and successfully developing company that started its activity in 2004 and during this time has successfully established itself in the Ukrainian and international markets. Over the past years, KMK Group has transformed from a small enterprise into a large structure, partners of which are leading European manufacturers.

ALCHIMICA

European manufacturer of construction chemicals and high quality polyurethane waterproofing materials. The products of this company are used in waterproofing various types of surfaces that require maximum accuracy, reliability and durability. Unlike other analogues, almost the entire line of waterproofing from this manufacturer is acceptable for indoor use, since it does not contain toxic components.

TOPAS UKRAINE

Certified manufacturer of biological wastewater treatment plants in Ukraine using European quality materials. A feature of this company is the 100% environmental friendliness of the technologies and processes used in the production and operation of wastewater treatment plants. By installing an autonomous sewerage system Topas Ukraine, you care about the cleanliness of the environment, since the cleaning efficiency of these installations is up to 98%.

PANELTIM

Belgian manufacturer of environmentally friendly plastic sandwich panels. In 2013 KMK Group has started cooperation with PanelTim and till today we are the only representatives in Ukraine. PanelTim products comply with all European environmental regulations and are 100% recyclable. Some of the products are made from recycled raw materials.

RINOFLEX SYSTEM

The first national brand of waterproofing materials, made specifically for the Ukrainian consumer. In 2019, KMK Group had founded its own waterproofing brand, RinoFlex, based on the world famous Alchimica plant mentioned above. RinoFlex products have incorporated many years of experience of Greek professional waterproofing technologies Alchimica and domestic developments in the field of production, taking into account the natural climate of Ukraine.

PLASTBUILD

Brand of modern polypropylene products of own production. Structural material - Belgian plastic sandwich panels PanelTim. The environmentally friendly components and reliable technologies used contribute to the long service life of the products, as well as the quality and convenience in daily use. Among the product range: cellars, boats, bar counters, fonts, containers, etc.

SHELTER PANELTIM

Underground premises are able to protect against threats of a natural or military nature and the effects of their consequences (tornado, hurricane, destruction, debris, blast and shock waves). Main advantages: installation in 24 hours, service life upon 50 years, hermetic structure, protection from external influences and debris as a result of explosions, installation in any type of soil, at any level of groundwater and near water bodies, without the need for waterproofing and insulation.

OUR TEAM

Family values have become the foundation of the effective corporate culture of KMK Group. The position of the company's leaders is based on the principle: each new victory is the collective merit of a group of people that are part of it. The leadership abilities and firmly set priorities of the founders influenced the future activities of the corporation in all directions.

Regular professional development programs are an integral part of unlocking the professional potential of each employee.

Cooperation, not competition, is the norm of relations with competing companies.

The exchange of international experience is a common daily work environment in which we live.

A specially designed DreamTeamBuilding motivational HR program - events to create the right atmosphere within the team, as well as encouragement to improve personal abilities.

Quality is remembered longer than the price
